

Cold Storage Solutions for all Sectors

Best Engineering Strength Totally Equipped with Knowledge For Large Operational Zone Accomplishment

WALK IN CHILLERS & FREEZERS

PANEL CONSTRUCTION

- Panels are manufactured with interior and exterior metal skins precisely formed to ensure proper size.
- Panel core is polyurethane form, using non CFC propellant.
- For Chillers, Panel thickness is 60 mm and for freezers, it is 100 mm

INSULATION

- Insulation is done by rigid polyurethane foam.
- Density is 40 kg/m3 to 44 kg/m3
- K-factor is 0.133 BTU per hour /foot square/F⁰/inch
- Yield compression strength 350 kg for floor, 200 kg for walls.

SECTION FASTERNERS AND CONNECTORS

- Each device consist of a precisely located cam lock and steel pin.(wall to wall, wall to ceiling, wall to floor)
- All locks are actuated from inside the enclosure with a standard type Allen wrench.
- All access holes are to finished with vinyl caps on wall and ceiling panels on floor panels.

SECTION GASKET

- All panel sections have two rows of closed cell gasket attached to the top, bottom, and cam lock side of the panel, creating aself-sealing, air-tight joint.
- Gaskets are NSF approved vinyl extruded gasket.

DOOR

DOORS

- Coolers and Freezer doors are of hinged and flushed type with a clear opening of 860 x 1980.
- Material: 0.50mm gauge stainless steel.
- Freezers doors are provided with strip heaters.
- Door finish matches with the panel finish both inside and out.
- Provide door locks of Kason Brand.
- Coolers and Freezers doors are provided with Kick plates of 610 mm height of No. 16 gauge stainless steel on both sides.
- Doors are having Built-in cylindrical lock, with cam lift-type self-closing door.
- Bottom of doors are provided with sweeping rubber wiper sealing gasket.

ACCESSORIES

- Panic Exit device operating from inside(Push Release Type).
- Pressure Relief Port
- See through strip curtain
- Vapour proof CFL Room light (300 Lux evenly distributed) IP-66 rated.
- Electrical Control Panel fitted on cold room panel.
- Both chillers and freezers have alarm system(optional).

FINISH

Material and thickness of material:

Walls- Exposed: 0.50mm gauge Stainless steel of type 304 grade Unexposed: 0.60mm gauge Precoated Galvanised steel Ceiling-Exposed: 0.50mm gauge Stainless steel of type 304 grade Unexposed: 0.60mm gauge Precoated Galvanised steel Floor- Unexposed: 16 gauge Precoated Galvanised steel.

FLOORS

- Exposed Surface is Alluminium chequered plate .
- A plywood of ½" is placed below the Chequered plate.

REFRIGERATION

- Refrigeration units can be water cooled or air cooled.
- Ambient Temperature is $43^{\circ}\text{C} \sim 45 \text{ C}^{\circ}\text{considering approx }10 \text{ times}$ the door is being opened and closed in 1 hour.
- Room Temperature range For chillers: +2°C to +8°C and For freezers: -20° C to -25° C.
- Coolers have air defrost timer, Frezeers defrost electric timer
- R404a 230V-Ac/440V, AC,3pH, air cooled or water cooled outdoor condensing units for both chillers and freezers.
- The refrigerant gas is CFC Free and environmentally friendly.
- All the compressors are hermetically sealed type.
- Evaporator units are cubical type or slim type.
- Connection with BMS is also available

CNC FABRICATED PUFF PANELS WITH CAM LOCK SYSTEM
